

## **Strawberry Coulis**

1 cup strawberries - hulled and halved

1/4 cup sugar

Water to cover the berries

Place the strawberries in a pan and cover with enough water. Add the sugar and mix. Simmer for about 25 minutes. Strain the fruit and press well. Make sure you do not discard any pulp and get rid of all seeds.

Return strained strawberries into pot and simmer until reduced and thickened. You can add alcohol to this if you would like. Cool down and use for drizzling on desserts.
