

Watermelon Granita

6 cups chopped watermelon

1/3 cup simple syrup

2 TBS lemon juice

Place the watermelon, syrup and lemon juice in a blender. Blend – working in batches. Pass the blended fruit through a sieve into a bowl. Squeeze the pulp in the sieve to use all of your fruit. Get rid of the pits.

Place the juice into a 13x9 rectangular dish. Place the dish into the freezer and freeze for 30 minutes. Remove from freezer and scrape with a fork. Repeat this process every 30 minutes for 3 hours – until you have an icee.

Serve your granite in a nice glass. Garnish with some watermelon rind. Enjoy!

You can make this from many kinds of fruits such as lemon, grapefruit or peach.
